THIRD YEAR.

MAYSVILLE, KY., THURSDAY, FEBRUARY 22, 1904.

ONE CENT.

IT'S SO IF IT'S IN THE LEDGER.

CABINETS \$1.99 per doz. at Parker's.

Just received lot of nice Vase Lamps at prices to go, at Schatzmann's, Market street.

G. W. GREENSLATE, one of Greenup county's oldest citizens, died Monday near Enterprise, aged 70.

REV. H. G. HENDERSON of Frankfort will conduct the prayer-meeting at the Second street M. E. Church, South. With this a series of protracted meetings will begin at this church and each day until further notice two services will be held, the first at 8 o'clock in the afternoon and the second at 6:30 p. m. All are invited.

DR. C. C. OWENS yesterday performed a most difficult surgical operation upon Thomas Warner, colored, of Washington. The patient is in a very serious condition and it is a matter of serious doubt as to his recovery. The peculiar part of the case was the fact that Warner had his skull fractured ten days ago but never knew it until yesterday when the physician was sent for. Blood-poison had set in before they notified Dr. Owens.

It will have friends visiting you, or if you are going away on a visit, please drop us a note to let us know.

L. M. Mills was in Cincinnati yesterday.

Captain N. Cooper was a business visitor to Cincinnati yesterday.

William Trout returned home yesterday from a five weeks visit to Hot Springs, Ark.

George T. Hunter is interviewing flour dealers along the line of the C. and O. West of the city.

Duke A. Rudy left yesterday afternoon for Buffalo, N. Y. He expects to be absent some time.

Charles Crawford, after a visit of several days to his parents, Mr. and Mrs. George Crawford of this city, returned yesterday to Covington.

The horse sale yesterday at William Wormald's Cow Yards was largely attended, but the bidding was apparently very slow.

Notice. Kindly call and settle your accounts either with money or negotiable note. Our Mr. Hechinger starts East on the 28th and settlements will facilitate his getting away. Respectfully, HECHINGER & CO.

IT MAKES PEOPLE WELL.

Best Spring Remedy in the World--Paine's Celery Compound.

There is one true specific for diseases arising from a debilitated nervous system, and that is Paine's Celery Compound, so generally prescribed by physicians. It is probably the most remarkable remedy that the scientific research of this country has produced. Professor Edward E. Phelps, M.D., LL.D., of Dartmouth College first prescribed what is now known the world over as Paine's Celery Compound, a positive cure for dyspepsia, biliousness, liver complaint, neuralgia, rheumatism, all nervous diseases and kidney troubles. For the latter Paine's Celery Compound has succeeded again and again where everything else has failed.

The medical journals of this country have given more space in the last few years to the many remarkable cases where the use of Paine's Celery Compound has made people well than to any other one subject.

ENORMOUS EXTENT OF THE IMPORTED EGG PRODUCT.

A Contrast Between the High Protection and the Free-trade Periods Which is Best for the American Farmer?

their wives and daughters, who take care of the poultry, instead of sending it to Europe, to Canada, to Mexico or to China. Such a large quantity, nearly 16,000,000 dozen eggs in a year, or 1,333,000 dozen a month, over 300,000 dozen a week and nearly 50,000 dozen of foreign eggs a day in our markets, had a visible effect on our supply. It glutted our markets and cheapened the price for American eggs.

Many farmers may think that this did not affect them. Let us see. We can best show this by giving the exact states and the exact towns in those states where those 16,000,000 dozen foreign eggs were imported. Here they are, with the quantity and their value:

This will be a little surprise to many farmers. The statement is reliable. It came from the official statistics of the Treasury Department at Washington, and it shows that foreign eggs were imported during 1889 into seventeen different states of the Union. Farmers should look at this list carefully to see if they live in any of those states where foreign eggs were sold when there was no duty upon them. We have given the towns as well, so that farmers can see if they live near any of the towns. It is important for farmers to know all this, because it shows them how Free-trade in foreign eggs hurts the American farmer.

But it is not only the farmers who live near these towns who are the losers. They must remember that, too, because it is important. Where most of the foreign eggs are received and sold there must be less demand for American eggs, and farmers living near those markets must sell their eggs cheaper. This forces an extra supply into other towns. With a large lot of foreign eggs in the markets of New York and Boston, the farmers of New York State and of Massachusetts must sell in some other state further West or South. Into Pennsylvania for instance. Then the Pennsylvania farmers are forced

FREE-TRADE SMASHED

The American People Carry the State by 160,000!

The latest returns from Philadelphia put Grover's majority in that city at 65,000. Several of the strongest Democratic counties show Republican gains of from 3,000 to 5,000.

Mr. Grover's majority in the state will be 190,000--the greatest in the history of the commonwealth.

The workmen want a change!

BISHOP J. V. MCNAMARA and his agent, John F. Parker, have been in Cincinnati several days. Mr. Parker left this morning for Kansas City, Mo., and the Bishop will start there Friday to be present at his trial, which is set for Monday. Mr. Parker yesterday informed THE LEDGER that a great change had taken place in public sentiment, and that the Americans of Kansas City were beginning to get their eyes open.

This ball given at the Neptune Hall last night by the Maysville Assembly was a most artistic success in every way. An stated yesterday it was given in the honor of the Misses Carrick of Central Kentucky, Miss Bradford of Covington, Miss Johnstone of Bucyrus, O., and Miss Hawkins of Scott county. Excellent music, and everybody in the best of spirits, went to make the evening a jolly one for those who were in attendance, and the guests can well feel proud of the effort of the Maysville Assembly in entertaining them.

SHADY SIDE OF EAST STREET.

My name is Happy Harry--that's what the neighbors say--
Because, perhaps, I'm cheerful and contented all the day--
So if you'd like to know me, at my house you'll always meet
This man at No. 60, shady side of Easy street.

I always take things calmly, don't worry, fret or frown,
And when my work is finished leave the store for home;
I never smoke tobacco, and the boys I never treat,
But live at No. 60, shady side of Easy street.

I mind my business only, leave other folks alone,
And always think a hearty laugh is better than a groan;
I never "speculate" in all in stocks, or shares or wheat,
And sleep at No. 60, shady side of Easy street.

My wife when we were married, didn't try to put on style,
And all day long she minds the house, just busy all the while
A-dren' up the children and makin' things look neat
And clean at No. 60, shady side of Easy street.

The youngsters look as healthy when they come home from school
(We bring 'em up by kindness, and not by any rule)
And when the day is over they run to kiss and greet
Their dad at No. 60, shady side of Easy street.

We've always got a dollar that we can safely spend
And if the neighbors need it, we've a dollar we can lend,
We're happy as the angels, and to you I'll just repeat
That we live at No. 60, shady side of Easy street.

CHENOWETH'S Dentine cleanses and beautifies the teeth. Try it.

MISS JENNIE MILLS of Flemingsburg and Ben Sanders of Paris will be married March 21st. Miss Mills is a daughter of John F. Mills and has a number of relatives in this city.

A HAT.

The Wilson Bill May Be Killed or Postponed.

That is the Opinion of the Leading Republicans of the Senate.

The Bill is New in Merit But Inconspicuous in Detail. It is a Democratic Action. Many Democrats Are For It. Many Others Are Against It.

WASHINGTON, Feb. 22.—The hope of either killing outright the Wilson tariff bill or of causing a postponement of all tariff legislation for at least one year was stronger in the minds of the leaders of the republican side than it has been at any time since the beginning of the session of congress. This statement is made with the utmost conservatism. It might, perhaps, be made in even stronger terms, but is entirely safe to say that the democratic tariff programme has at present come to an absolute halt and is in absolute peril.

It must be admitted on all sides that the democratic leaders are not only divided among themselves to such an extent that they have practically proved their inability to secure passage of the tariff bill in committee, but are in a condition of terrified dismay at the result of the election Tuesday in Pennsylvania. Of course no democratic congressman expected any result in Pennsylvania excepting what happened at Gettysburg. The republican side of the election Tuesday in Pennsylvania was a disaster to the democratic cause. Not a single democratic congressman was elected. Not a single democratic congressman was elected. Not a single democratic congressman was elected.

As the tariff bill was absolutely the only issue in the Pennsylvania election, the result is interpreted by intelligent democratic leaders as a warning that the east would vote upon the question if an opportunity offered. It is this fact which has caused Senators Hill and Murphy to pull their thinking cap more closely to their heads. It is this fact which confirms Senator Smith of New Jersey, in his demand that the tariff be revised, if revised at all, upon the question of protection, and which has so frightened his colleague, McPherson, that he literally does not know where he is at. As a result, the financial situation in the state of panic and the democratic triumvirate, who have been endeavoring to frame a bill that could pass the senate, are disarrayed by the decision of Mr. Mills.

The first rock in the way was that of Senator Jones and West. Mr. Jones, the first confederate senator from Louisiana on the basis of a duty of one cent a pound. This was absolutely refused, the Louisiana senators in legislation upon one of the tariff bills at this point also the refining industry, with its millions of capital and vast political influence, came into the field. Instead of dealing with the committee on the tariff, the representatives of this industry approached recognized democratic leadership on the floor of the senate and secured an absolute promise that whatever duty was placed upon raw sugar, an additional duty of one-quarter of a cent per pound should be levied on the refined article. If raw sugar were free, there would be placed, according to this bargain, a duty of one-quarter of a cent on refined sugar. There should be a duty of one cent, or one and one-half cent on raw, there would be one-quarter of one cent additional on refined sugar.

Then it became necessary to conciliate the Maryland senators with a duty on coal; the Alabama senators with a duty on iron ore; the Georgia senators with a duty on lumber and on silver-bearing lead ore. This went on until finally it became evident that if any democratic votes were to be procured by the senate, other concessions must be made until the Wilson bill would be transformed into a protective measure for all raw materials excepted.

It is this extraordinary situation which gives the republicans the hope of defeating or postponing the bill. In the opinion of some of the leading members of the republican leadership a motion to postpone all tariff legislation until the first Monday of next December could be carried in the senate. The purpose of such a motion would be to have the question of tariff revision passed upon at the polls next November, and in the meantime give the suffering country a year's time for rest and recuperation.

Other Financialing. LONDON, Feb. 22.—The standard says that Adrian Hope, one of the largest depositors in the Bank of England, was permitted by that institution to overdraw his account to the sum of £400,000, Hope having lost all his deposits in speculative stock speculations. The bank made a demand upon Hope for £350,000, which was not forthcoming, and finally settled with him for £125,000 to protect Hope against a future bankruptcy, which would have involved the total loss to the bank of his indebtedness.

Slashed While Apologizing. CLARKSVILLE, Tenn., Feb. 22.—Two men named Collins and Jackson engaged in a dispute in Stewart county, the former stating that the latter, who was trying to get out of the county, was guilty of a crime. Jackson, who was in the company of a woman, was shot and killed. The assassin had not been captured.

Dynamite Factory Explodes. NORTON, Pa., Feb. 22.—The dynamite factory at Norton, Pa., exploded Wednesday morning with a noise heard ten miles. A man named Fritz was in the building alone at the time, and he and the factory were blown to bits. The explosion is heavy.

FARM ANIMALS.

The Prices in the United States Have Declined as Well as Numbers.

WASHINGTON, Feb. 22.—Figures on the number and value of farm animals, as well as complications made by special agents, are included in the report of Statistician Robinson, of the agricultural department, for January and February. The total number of horses has decreased 125,000 as compared with the returns of a year ago, although there was an increase in thirty of the states. The number of horses of horses last January was 10,811, 130,000. Prices have declined in all the states and territories except Rhode Island and Idaho. The total number of cattle in the country in January was 2,852,331. There was a slight increase in the number and value of milk cows. The number at present is 1,487,400 as against 1,434,087 a year ago, and aggregate an average value of \$58,998, 681 against \$57,299,785. There was an increase in the number of cattle from 19,954,190, valued at \$547,898,994, last year, to 20,008,168, valued at \$550, 707,477. The number and price of both sheep and goats have declined. The total number of farm animals last month was 101,738,453. It is stated that in the total number of these farm animals there was a better rate of increase during the decade 1870-1880 was 1.07 per cent. In the following decade it rose to 3.17 per cent, and between 1890 and 1900 it averaged an average annual decrease of two-tenths of one per cent. The comparative average of cotton crops are given by states as follows: Virginia, 95; North Carolina, 95; South Carolina, 82; Georgia, 93; Florida, 100; Alabama, 96; Mississippi, 100; Louisiana, 95; Texas, 84;
